Assessing the Health Status of Your Camper.

Does your child have:

1. Fever (100°F or greater)? Yes No
2. Sore throat? Yes No
3. Cough? Yes No
4. Stuffy Nose? Yes No
5. Muscle aches or lethargy. Yes No

- If you checked "yes" for fever alone or to any two (or more) of the other symptoms, keep your child at home because of the possibility of an influenza-like illness. The current recommendation is that children remain home for seven days after influenza-like symptoms start, even if the child is no longer ill. If your child is still sick after seven days, keep your child at home until well for 24 hours. If you have questions about your child's health or symptoms, call your child's healthcare provider.

- If your child has been diagnosed by a healthcare provider with a different disease – such as strep – follow your healthcare provider's recommendation. Scout camps are adventurous, active and frequently wilderness environments. There is no provision for lodging other than in an un-air conditioned tent. Please assure the health and safety of all of our campers by assuring that only scouts and scouters who are healthy come to camp.
